Ø=Þ¨ Violence Detection Report

Report ID: 9f1ab72d-8bac-4ed6-9d08-1d60c38ae73a
Time: 2026-01-27T05:20:15.784Z
Status: SUSPICIOUS
Confidence: 85%

Explanation:

The image depicts a dynamic scene involving three individuals with clear physical interaction that strongly suggests a potential altercation or a situation escalating to physical violence. One person is on the ground, another is bent over them in what could be an aggressive or dominant posture, and a third person is physically restraining or pulling back the second. The open-mouthed expression of the restraining individual further contributes to the impression of a heated or intense moment. While the exact

intent (e.g., real fight, playful wrestling, or a staged event) cannot be definitively determined from a still image alone, the visual cues align with indicators of a physical attack or intervention. Therefore, it is classified as suspicious with a high confidence due to the explicit physical contact and confrontational body language observed among the subjects.
